

### Selecting Sales Staff

Create a program that lets the user select rows from the *SalesStaff* table. Fill a ComboBox control with the names (last, first). When the user makes a selection, the other controls on the form should display details about the staff member selected.

The screenshot shows a Windows application window titled "Selecting Sales Staff". The window contains a form with the following controls:

- A label "Select a Name:" above a ComboBox control.
- A label "ID:" followed by a text box.
- A label "Full Time:" followed by a checkbox.
- A label "Hire Date:" followed by a date picker control showing "8/27/2019".
- A label "Salary:" followed by a text box.
